Austin, TX · ashmitbohora@utexas.edu · [linkedin.com/in/ashmitbohora](https://www.linkedin.com/in/ashmitbohora) · github.com/ashmitbohora · ashmitbohora.com

EDUCATION

The University of Texas at Austin · B.S. Statistics and Data Science

Expected May 2029 · GPA 3.7/4.0

QuestBridge Finalist (2024) · UT Austin Impact Scholar (\$48,000 merit award)

Coursework: Calculus II, Introductory Statistics with R, Statistical Thinking

EXPERIENCE

Social Media & Content Intern (growth & analytics) · WLF Club

Fort Worth, TX · May 2026 – Present

- Stood up the company's entire web-analytics stack from zero measured traffic: GA4, Search Console, Microsoft Clarity heatmaps, and Meta Pixel across the site and three funnels (588 users, 1,109 pageviews tracked in a 28-day window)
- Analyzed 780+ CRM sales opportunities in GoHighLevel and found 95% never reached a decision despite a 92% win rate when worked; reframed the growth plan from "buy more ads" to working the existing backlog
- Built three lead-generation funnels, each wired to GA4, Meta Pixel, and Clarity with 12 UTM/attribution fields flowing into the CRM (verified 12/12 populated on a live test)
- Audited a \$15,000 agency-built website and executed the fixes in-house: published 12 unfinished pages, repaired broken routes with redirects, added schema markup and SEO fixes, replacing \$150/hr agency billing
- Built an internal ops dashboard (React, Vite, Supabase on Vercel) and a 25-module staff training site; designed a retrieval-augmented knowledge tool on the business's own data (see Warvis)

Founder · Webspansion

Eules, TX · Apr 2024 – Present

- Founded a web studio and shipped 28 production websites solo (intake, scope, build, deploy, handoff) for local businesses and nonprofits, accessibility-first
- Built a Python automation pipeline (Playwright, Pillow, fal.ai) generating Open Graph and blog hero images from a manifest; automated the client CRM with Google Sheets + Apps Script
- Wrote and SEO-optimized 23+ blog posts and 8 case studies; instrumented analytics (Clarity, Vercel) to drive UX and design decisions

PROJECTS

PickMyPath · guitar practice & analytics platform

pickmypath.app

Next.js 16, React 19, TypeScript, Supabase/PostgreSQL, Python

- Shipped a full-stack app (327 TypeScript files): chord-aligned lyrics, 5-level practice tracking synced to PostgreSQL, and Plotly analytics dashboards
- Designed a 73-song structured dataset and a Python ingest/validate pipeline; built a recommendation engine using Jaccard similarity across chords, genre, and mood; wrote SQL data-quality checks and led a v1 to v2 architectural rebuild

Warvis · local retrieval-augmented knowledge system

TypeScript · RAG

Next.js 16, TypeScript, libSQL/SQLite, Transformers.js (local embeddings)

- Built a RAG chat system that ingests 700+ documents into a searchable, cited knowledge graph using hybrid search (SQLite FTS5 + local embeddings)
- Designed a HIPAA-aware PHI-scanning gate and a fail-closed, tiered access-control model enforced across every retrieval query; 152 passing tests

BohoBites · creator analytics pipeline

Python · Data

Python, Pandas, Shiny, Plotly

- Built an end-to-end analytics system on real TikTok data: schema repair, rolling 30–365 day KPI windows, posting-time models, and audience demographics in an interactive Shiny dashboard informing a 6K+ follower brand

Also built: BohoQuest (Expo/React Native check-in app with server-side anti-cheat, Supabase; web app live at app.bohoquest.app) · Prospanion Studio (multi-tenant Cloudflare Workers + D1 CMS with hardened auth) · BoHub (local AI personal OS: Claude API tiered routing, SQLite FTS5)

LEADERSHIP & SKILLS

Community, DFW & NST Mandir (2021–Present): co-led youth programs raising \$10,000+; ran logistics for health camps, blood drives, and community events

Languages: Python, R, SQL, TypeScript, JavaScript | Pandas, NumPy, Plotly, Shiny, FastAPI

Frameworks & data: React 19, Next.js 16, Astro, Tailwind · Supabase/PostgreSQL, SQLite/libSQL

AI & tooling: Claude & Gemini APIs, RAG, prompt engineering · Git, Playwright, Vercel, Cloudflare

Spoken: English, Nepali (fluent); Hindi, Spanish (intermediate)
