Statistics & Data Science sophomore building the growth stack and the software beneath it: attribution, CRM automation, ads.

EDUCATION

The University of Texas at Austin

Expected May 2029

B.S. Statistics and Data Science

GPA 3.75 / 4.0

Coursework: Probability & Statistical Inference (estimation, hypothesis testing, confidence intervals), Linear Algebra, Intro to Data Science, Software Design

SKILLS

Data & analysis: Python (pandas, NumPy, Plotly, Shiny), R, SQL (PostgreSQL, SQLite), Excel, dashboards, data pipelines

Analytics & growth: GA4, Microsoft Clarity, Meta Pixel & Ads, Google Ads, GoHighLevel CRM, UTM attribution, identity resolution, HIPAA-aware data handling

Software: TypeScript, React, Next.js, Cloudflare Workers, Supabase, Git, Claude Code, Claude & Gemini APIs, RAG

EXPERIENCE

WLF Club

May 2026 – Present

Growth & Analytics Engineer (part-time)

Fort Worth, TX / Remote

HIPAA chiropractic and performance clinic; owns analytics, tracking, and CRM reporting (3,050 contacts)

- Cut wlfclub.com page weight 60% (2,027 KB to 814 KB) and raised Lighthouse 68 to 91 by rebuilding a \$15,000 agency site that still served dead \$79.99 template pricing to AI crawlers.
- Made ad spend attributable for the first time by building the measurement stack from zero: GA4, Meta Pixel, Microsoft Clarity, and a first-party tracker resolving anonymous visitors to named CRM contacts.
- Cut \$12,000/yr in vendor spend by replacing Heads Up Health with an in-house members platform: WHOOP and Apple Health sync, a 17-marker labs engine, and AI on Vertex AI under a signed GCP BAA.
- Analyzed 782 CRM sales opportunities from two CSV exports and found 95% never reached a decision while decided deals won 92%; the finding moved the growth plan from more ad spend to follow-up.

Webspansion & Prospansion

Dec 2023 – Present

Founder & Web Developer

Euless / Austin, TX

Free sites for nonprofits and immigrant-owned businesses; paid client builds under Prospansion

- Shipped 19 live client websites solo, intake through handoff, and closed the first paid build at \$999.
- Built a cookieless first-party analytics platform on Cloudflare Workers and D1 that tracks 27 client domains; live builds average 97 Lighthouse SEO with WCAG AA contrast and keyboard paths.

PROJECTS

BohoBites posting analytics – tiktok.com/@bohobites

Python, pandas, Plotly, Shiny

- Recovered the full 67-post history after TikTok's export capped at 15 videos, then built per-hour engagement heatmaps and best-time-to-post in a Shiny dashboard that schedules a 7.2K-follower account (top video 558K views).

Guruji – getguruji.com

React, Expo, Supabase, TypeScript

- Found 57 of 58 new quiz items placed the correct answer in the same slot, so a learner could score 100% without reading; reshuffled the catalog and shipped a regression test that fails any track over 55% in one slot.
- Free app teaching AI and coding to adult beginners, South Asian and immigrant families first: 196 lessons in 7 prerequisite-chained tracks, WCAG AA, replacing \$100/month tutoring for its first users.

Kiln – local model training loop

Python, MLX, LoRA, Ollama

- Fine-tuned a 7B model on-device to turn scraped websites into structured redesign records, with Claude as the teacher: held-out score 0.84 to 0.99 in one round, then a keep-or-rollback gate that rejected a later regression on its own.

PickMyPath – guitar practice platform (archived)

Next.js, PostgreSQL

- Built a Jaccard-similarity recommender over a 73-song dataset that sequences the next practice song from what a guitarist already knows.

LEADERSHIP

Director of Social, Nepalese Student Association at UT Austin

2026 – Present

Lead a 3-person team running a 17-event fall slate, campus partnerships, and ride logistics for every off-campus event.

Youth Programs Volunteer, DFW & NST Mandir

2021 – Present

Co-led youth programs that raised \$10,000+; ran logistics for health camps and blood drives.

HONORS & AWARDS

QuestBridge College Match Finalist (2024) | UT Austin Impact Scholar (\$48,000) | Merner Scholarship (\$2,000)
