Austin, TX | ashmitbohora@utexas.edu | [linkedin.com/in/ashmitbohora](https://www.linkedin.com/in/ashmitbohora) | github.com/ashmitbohora | ashmitbohora.com

Statistics & Data Science student and AI engineer building local-first AI systems, growth automation, and free community tech

EDUCATION

The University of Texas at Austin

Expected May 2029

B.S. Statistics and Data Science

GPA 3.75 / 4.0

QuestBridge Finalist (2024) · UT Austin Impact Scholar (\$48,000 merit award) · Thomas & Elizabeth Merner Scholarship in

Natural Sciences (\$2,000, 2026–2027)

Coursework: Elements of Software Design, Linear Algebra, Probability & Statistical Inference (Fall 2026) · Intro to Data Science, Statistical Thinking, Multivariable Calculus

EXPERIENCE

GTM Engineer — WLF Club

May 2026 – Present

Growth, analytics, and internal engineering (1099)

Fort Worth, TX → Remote (Austin)

- Rebuilt wlfclub.com in-house, replacing a \$15,000 agency build that still had 12 Lorem Ipsum placeholder pages live in production: 30+ pages, new hosting, and a verify-gated deploy pipeline, ending agency billing entirely
- Migrated a live medical clinic's DNS to Cloudflare with zero downtime and zero mail interruption, verifying 29 records and SPF/DKIM/DMARC under a p=reject policy before cutover
- Built Warvis, an internal RAG assistant hosted for the whole team with a HIPAA-aware PHI-scanning gate and fail-closed access control (229 passing tests); the owner now talks to it by voice to check on the business
- Built a member health portal (Cloudflare Workers + D1) replacing paid HeadsUp Health software: WHOOP/Apple Health wearable sync, a 17-marker labs engine, and an AI assistant over members' own data, plus a companion native app live on TestFlight

Founder — Webspansion & Prospansion

Apr 2024 – Present

Pro bono web studio + paid data/automation arm

Euless, TX

- **Webspansion (free):** founded an accessibility-first pro bono web studio, shipping 19+ free live websites (intake through deploy) for nonprofits, immigrant-owned businesses, and community groups
- **Prospansion (paid):** built Prospansion Studio, a multi-tenant Cloudflare Workers + D1 CMS with hardened auth (invite-only signup, hashed tokens, single-use resets) and a fixed sanitizer-bypass XSS vuln (verified via exploit proof-of-fix), deployed for nonprofit client Ocura
- Drove SEO and brand imagery at scale: 23+ optimized blog posts, 8 case studies, and automated OG/blog-hero image generation (Python, Playwright, Pillow, fal.ai)

PROJECTS

Guruji & BohoQuest — Shipped Production Apps

React · Expo · Supabase

- **Guruji (getguruji.com):** built and deployed a free, gamified Duolingo-style community-education PWA (React, TypeScript, Supabase) with RLS-scoped auth, an AA-verified UI, and a self-run security audit against the live database (zero exploitable vulnerabilities)
- Drove real impact: a cousin used Guruji to realize he was overpaying an agency \$100+/month for work he could do himself and canceled, saving \$1,200+ a year
- **BohoQuest (app.bohoquest.app):** shipped a gamified check-in app (Expo/React Native) with server-side anti-cheat verification (Supabase RPC), Apple Sign-In, and a 121-test suite; live in TestFlight

LEADERSHIP & SKILLS

Community — DFW & NST Mandir (2021–Present): co-led youth programs raising \$10,000+; ran logistics for health camps, blood drives, and community events; extended free education (Guruji) and free websites (Webspansion) to nonprofits and immigrant-owned businesses

Languages: Python, R, SQL, TypeScript, JavaScript | Pandas, NumPy, Plotly, Shiny, FastAPI

Frameworks & Data: React 19, Next.js 16, Astro, Tailwind · Supabase/PostgreSQL, SQLite/libSQL · GoHighLevel, GA4

AI & Tooling: Claude Code, Codex, Claude & Gemini APIs, RAG · Git, Playwright, Vercel, Cloudflare

Spoken: English, Nepali (fluent); Hindi, Spanish (intermediate)
