

Ashmit Bohora

Austin, TX · open to DFW & remote | (682) 336-1161 | ashmitbohora@utexas.edu | [linkedin.com/in/ashmitbohora](https://www.linkedin.com/in/ashmitbohora) | github.com/ashmitbohora | ashmitbohora.com

Statistics & Data Science sophomore who builds the growth stack and owns the revenue it feeds: attribution, CRM automation, paid campaigns, and the software underneath

EDUCATION

The University of Texas at Austin

Expected May 2029

B.S. Statistics and Data Science

GPA 3.75 / 4.0

QuestBridge Finalist · UT Austin Impact Scholar · Merner Scholarship in Natural Sciences

Coursework: Probability & Statistical Inference, Linear Algebra, Elements of Software Design, Intro to Data Science, Statistical Thinking

EXPERIENCE

Growth Engineer — WLF Club

May 2026 – Present

Healthcare provider under HIPAA. Owns analytics, tracking, website, and CRM automation

Fort Worth, TX / Remote

- Rebuilt wlfclub.com after finding the \$15,000 agency build still served dead \$79.99 template pricing and Lorem Ipsum to AI crawlers; added sitewide JSON-LD, FAQ schema, and llms.txt, cut over DNS to Cloudflare with zero downtime, and cut page weight 2,027 KB to 814 KB (Lighthouse 68 to 91).
- Replaced a \$12,000/yr vendor (Heads Up Health) with a members platform: WHOOP and Apple Health sync, a 17-marker labs engine, role-scoped access, and AI routed to Vertex AI under a signed GCP BAA rather than a consumer API; every other system architected PHI-free and out of HIPAA scope.
- Instrumented the clinic from zero: GA4, Meta Pixel, Microsoft Clarity, and a first-party tracker doing identity resolution from anonymous visitors to named CRM contacts.
- Built Warvis, the team's internal RAG assistant: BM25 retrieval over 391 notes, a weekly report pulling GoHighLevel, QuickBooks, and GA4, and an identity-resolution dashboard linking anonymous visits to known contacts.

Founder — Webspansion & Prospansion

Dec 2023 – Present

Webspansion: free sites for nonprofits and small businesses. Prospansion: paid client builds

Eufless / Austin, TX

- Shipped 19 live websites solo, intake through handoff, for immigrant-owned businesses, nonprofits, and student groups; closed the first paid build at \$999.
- Engineered a cookieless first-party analytics platform (Cloudflare Workers, D1) tracking 27 client domains; ran the studio's own growth with 23 SEO posts and 8 case studies.

PROJECTS

- **BohoBites & Bohos BTS** (TikTok, DFW and Austin) — food-review brand grown to 7.2K followers and 122K likes across 67 posts, top video 558K views; Python analytics pipeline (pandas, Plotly, Shiny) behind it.
- **Family Assistant** (family.ashmitbohora.com) — bilingual English/Nepali retrieval assistant on Cloudflare Workers with signed-cookie auth and rate limiting.
- **Guruji** (getguruji.com) — free gamified app that teaches beginners to code, replacing \$100/month paid tutoring for its first users; row-level-security auth, accessibility-verified UI.
- **BohoQuest** (app.bohoquest.app) — check-in app with server-side anti-cheat, shipped to TestFlight (Expo, Supabase).
- **PickMyPath** (pickmypath.app) — guitar practice platform with a 73-song dataset and a Jaccard-similarity recommender (Next.js, PostgreSQL).

LEADERSHIP

Director of Social — Nepalese Student Association at UT Austin

2026 – Present

Youth Programs Volunteer — DFW & NST Mandir

2021 – Present

Co-led \$10,000+ in fundraising and ran logistics for health camps and blood drives.
