

Ashmit Bohora

Austin, TX | (682) 336-1161 | ashmitbohora@utexas.edu | linkedin.com/in/ashmitbohora | github.com/ashmitbohora | ashmitbohora.com

Statistics & Data Science sophomore who builds the software and owns the marketing it feeds: analytics stacks, CRM attribution, growth automation, and the content on top

EDUCATION

The University of Texas at Austin

Expected May 2029

B.S. Statistics and Data Science

GPA 3.75 / 4.0

QuestBridge Finalist (2024) · UT Austin Impact Scholar (\$48,000 merit award) · Merner Scholarship in Natural Sciences (\$2,000, 2026–27)

Coursework: Probability & Statistical Inference, Linear Algebra, Elements of Software Design (Fall 2026) · Intro to Data Science, Statistical Thinking, Multivariable Calculus

EXPERIENCE

Growth Engineer — WLF Club (chiropractic & longevity clinic)

May 2026 – Present

Owens the online side: analytics, tracking, website, CRM automation, reporting (contract, 1099) *Fort Worth, TX → Remote (Austin)*

- Stood up the clinic's measurement stack from zero: GA4, Meta Pixel, Microsoft Clarity, and a privacy-gated first-party tracker on every page (8,597 human events and 567 durable visitor IDs in the first weeks), then an identity-resolution layer that matches anonymous visitors to named CRM contacts through a GoHighLevel webhook, verified end to end in production
- Analyzed 780+ CRM sales opportunities and found 95% never reached a decision despite a 92% win rate when worked; reframed the growth plan from "buy more ads" to working the existing backlog
- Rebuilt wlfclub.com in-house, replacing a \$15,000 agency build that had 12 Lorem Ipsum pages live: 31 pages, JSON-LD on every page, a 121-rule redirect map with zero broken targets, and a zero-downtime DNS cutover to Cloudflare (a 3,217-contact email send delivered at 99.74% the same day)
- Cut homepage weight from 2,027 KB to 814 KB (mobile Lighthouse 68 to 91); ran the first paid Meta campaign, diagnosed a 51% sub-3-second bounce on a 1.78 MB landing page, and paused spend until the page was fixed
- Built Warvis, the team's internal AI assistant (retrieval over 391 business notes, HIPAA-aware PHI-scanning gate, 610 passing tests, hosted at ~\$12/mo) and its weekly Data Room, which pulls appointments, invoices, and lead sources straight from the GoHighLevel API so the owner reads live numbers instead of a spreadsheet
- Shipped an AI front-desk chat on every page, red-teamed it with 20 hostile prompts and fixed 7 defects; built a member health portal (Cloudflare Workers + D1) with WHOOP/Apple Health sync and a 17-marker labs engine to replace paid software

Founder — Webspanion & Prospansion

Dec 2023 – Present

Free web studio for small businesses and nonprofits, plus a paid build arm

Euless, TX / Austin, TX

- Shipped 19 live websites solo (intake, scope, build, deploy, handoff) for immigrant-owned businesses, nonprofits, and student groups; closed the first paid build (\$999) in Aug 2026
- Built a cookieless first-party analytics platform (Cloudflare Workers + D1) that now tracks 27 client domains; ran the studio's own growth with 23+ SEO-optimized posts, 8 case studies, 118 UTM-tagged outbound links, and per-page Open Graph cards generated by a Python pipeline

Founder & Creator — BohoBites (TikTok food reviews, DFW & Austin)

2025 – Present

- Grew the account to 7.2K followers and 122K likes across 67 posts, with a top video at 558K views; built the analytics pipeline in Python (pandas, Plotly, Shiny) with rolling 30–365 day KPI windows and posting-time models, and a pitch page per inbound restaurant with live view counts

PROJECTS

- **Retrieval systems, built three times:** Warvis for WLF (above); a bilingual English/Nepali family assistant at family.ashmitbohora.com (Cloudflare Worker, signed-cookie auth, rate-limited); and BoHub, a local knowledge OS that indexes 1,000+ markdown notes into SQLite FTS5 with tiered Claude API routing
- **Shipped apps:** Guruji (getguruji.com), a free gamified community-education app with row-level-security auth and an AA-verified UI; PickMyPath (pickmypath.app), a guitar practice platform with a 73-song dataset and a Jaccard-similarity recommender (Next.js, PostgreSQL, Python); BohoQuest (app.bohoquest.app), the check-in app behind the Boho social brands, with server-side anti-cheat and a 121-test suite (Expo, Supabase, TestFlight)

SKILLS & LEADERSHIP

Analytics & growth: SQL, GA4, Microsoft Clarity, Meta Pixel & Ads, Google Ads, GoHighLevel CRM, UTM attribution, identity resolution, SEO & schema markup, Core Web Vitals

Languages & data: Python (pandas, NumPy, Plotly, Shiny), R, SQL, TypeScript/JavaScript · PostgreSQL (Supabase), SQLite/D1

Web & AI: React, Next.js, Astro, Cloudflare Workers, Vercel · Claude Code, Claude & Gemini APIs, RAG · Git, Playwright

Leadership: Director of Social, Nepalese Student Association at UT (2026–) · DFW & NST Mandir youth programs (2021–): co-led fundraising of \$10,000+, ran logistics for health camps and blood drives

Spoken: English, Nepali (fluent); Hindi, Spanish (intermediate)
